Education

Indian Institute of Information Technology, Lucknow — Lucknow, India
B.Tech in Computer Science and Artificial Intelligence; CGPA 8.6/10 — *Aug 2023 – Jun 2027*
Coursework: Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks, OOP

Experience

Walmart Global Tech — Onsite
Software Developer Intern — *May 2026 – Jul 2026*
- Built a data migration pipeline that moves and validates large datasets across internal systems with integrity checks.
- Developed AI agent skills on the Model Context Protocol (MCP) that correlate logs and metrics from OpenObserve, Grafana, and Prometheus, with pod-level diagnostics and automated root-cause reports for incidents.
- Drove cloud cost optimization across Kubernetes services. *Java, Spring Boot, Python, Kubernetes, MCP*

Nugget by Zomato — Onsite
Engineering Intern — *Dec 2025 – Feb 2026*
- Architected LLM-powered ticketing for voice bots that captures, classifies, and resolves issues; shipped multi-tenant deployments for Tata 1mg and VoloHealth.
- Engineered high-throughput Go microservices on Ozonetel dialers and SIP telephony for inbound and outbound calls.
- Built the backend for a real-time agent-assist tool that hands live calls to humans with the full conversation context.

Eternal (Zomato) — Onsite
Engineering Intern — *Jun 2025 – Sep 2025*
- Shipped production voice bots end to end (NLU, TTS, STT, VAD) on Gemini, Deepgram, ElevenLabs, and OpenAI/Groq.
- Built a modular voice-orchestration framework adopted by Zomato Ads to automate customer-support workflows.
- Set up GitOps CI/CD from scratch with GitHub Actions, ArgoCD, and Infrastructure as Code on AWS EKS and ECS.

UBIQCURE (healthcare startup) — Remote
Software Engineering Intern (Tech Lead) — *Aug 2024 – Nov 2024*
- Shipped four production web portals (user, health and school management, landing) with React, Node.js, and MongoDB.
- Led a team of 6+ engineers with Jira and Agile; sped up Azure CI/CD deployments with Docker.

Open Source

stdlib-js: the standard library for JavaScript — Remote
Maintainer — *May 2024 – Present*
- Authored 160+ merged pull requests across the BLAS, LAPACK, and statistics packages, including C-level BLAS extensions and WebAssembly implementations that speed up numerical computing.

Projects

raft-kv: Distributed Key-Value Store | *Go, gRPC, bbolt* — 2026
- Built a strongly consistent, replicated key-value store from scratch on Raft: leader election, log replication, and snapshotting over gRPC, persisted in bbolt.
- Kill the leader mid-write and a new one is elected in a few hundred ms with no committed data lost; race-detector clean.

Limit Order Book: Low-Latency Matching Engine | *C++20, CMake* — 2026
- Price-time-priority matching engine, zero dependencies: limit and market orders, O(1) cancel/modify, self-trade prevention.
- Benchmarked at 6.97M orders/sec with 68 ns p50 and 319 ns p99 latency; property-tested and sanitizer-clean.

KubeStore: Kubernetes Store Provisioning Platform | *Go, React, Kubernetes, Helm* — 2026
- Go platform that provisions MedusaJS and WooCommerce stores via Helm (install, upgrade, rollback) on Kind and k3s.
- Namespace isolation, persistent volumes, RBAC, network policies, rate limiting, and a React observability dashboard.

ActionGuard: Execution Firewall for AI Agents | *Python, SQLite, SSE* — 2026
- Gateway that allows, denies, or holds agent tool calls for human approval by policy and risk score; hash-chained audit log.

Technical Skills

Languages: Go, C++, Java, Python, TypeScript, JavaScript, C, SQL, Bash
Backend and Systems: Spring Boot, Node.js, Express, FastAPI, Django, gRPC, REST, GraphQL, Kafka, Microservices
Frontend and Databases: React, Next.js, Tailwind CSS; PostgreSQL, MySQL, MongoDB, Redis, SQLite, Supabase
Cloud and DevOps: AWS (EKS, ECS), Azure, Docker, Kubernetes, Helm, GitHub Actions, ArgoCD, Linux, Prometheus
AI: LLM integration, RAG, AI agents, Model Context Protocol, LangChain, voice pipelines (STT, TTS, VAD)

Achievements

- Overall Winner, GenTech Thales; Global Top 11, Walmart Sparkathon; 2nd ML, 3rd Finance at Techkriti IIT Kanpur.
- **Codeforces Specialist** (peak 1534), **CodeChef 4-star** (peak 1813); global rank 386 in a Codeforces Div. 2 contest.

Leadership

AXIOS, the technical society of IIIT Lucknow — Aug 2024 – Present
- **Web Wing Coordinator:** rebuilding the official IIIT Lucknow website on Next.js, Supabase, and Vercel (30+ merged PRs) with a role-based admin, two-factor auth, and an audit log; ran 10+ technical events for 240+ students.
- **FOSS Wing Senior Member:** led open-source workshops for 240+ students and promoted Hacktoberfest.
